

Amended Ordinance of the City of Morganfield, Kentucky
Establishing a Policy on Water and Sewer Adjustments

Pool Fills: The volume of water purchases which is used in the calculation of sewer charges may be adjusted if the user purchases a significant volume of water (not less than 8,000 gallons) for a swimming pool. Before an adjustment will be considered, the user will be responsible for documenting the quantity of water used and report it to the City of Morganfield Waterworks for adjustments to the sewer charges for excess over the customer's average usage over the previous months prior to any adjustment request. There shall be only one adjustment per calendar year.

It shall be known that the city does have a meter available for such usage that is available by requesting and paying an installation charge and a monthly bill.

This adjustment shall be in full force and effect on and after its adoption, approval, and publication as required by law.
